

The Russians are within twenty-four hours' march of Constantinople.

A fearful wind storm in New Jersey has strewn the coast with wrecks, destroyed much property and killed quite a number of people. It is the most severe storm ever experienced there.

Greece has declared war against Turkey—to save the lives of Christians.

General Miles is preparing to move against Sitting Bull about the 10th of February. His force consists of eight companies of cavalry and six or eight of infantry, with all obtainable Crow Indians.

Abram Black has resigned the presidency of the Odd Fellows' Bank, San Francisco. Martin Heller has been appointed in his place.

Superintendent Dodge, of the San Francisco mint, has issued an order to stop the coinage of trade dollars for the next ten days.

The loss of life by the Metropolis is now reduced to 100.

Heavy storms are reported in New York and Boston. Much damage is being done.

A Canadian laborer's wife at St. Benoit has given birth to twins, united like the Siamese twins.

Ben. Wade is seriously ill with typhoid fever, at Cleveland, Ohio.

Austria has decided to bring forward a resolution to secure the neutrality of the Danube at all hazards.

It is said that J. Madison Wells, of the Louisiana Returning Board, is concealed in Washington, whither he has fled to claim the protection of the Administration.

Don Pedro has made up a new Ministry, the public sandals attaching to the late Ministry making the action necessary.

The Sultan has telegraphed the Czar demanding an armistice.

Italy is prepared to make an alliance with any of the powers to oppose Russian supremacy.

George Critchank, the well known draughtsman and caricaturist, is dead.

CONDITION OF THE BUSINESS OF THE COUNTRY.

The Public says: Transportation seems to be the secret of the only important improvement in bank transactions. During January Boston and New Orleans have been doing more business than last year, and other competing cities have been doing less. New Orleans has a legitimate and permanent advantage in the opening of the river mouth, and a temporary advantage in the excellence of a crop, of which a large proportion was held back until Northern water routes were closed. Boston has greater advantage in lower rates by steamer and the Grand Trunk line than other Eastern cities have enjoyed. These cities gain. New York and Philadelphia lose. Baltimore loses a little in spite of discrimination of rail rates in its favor. The general current of events shown by losses also at Philadelphia, Chicago, Cincinnati, St. Louis, Pittsburgh, Louisville and Providence, Milwaukee gains because the wheat crop is good, as it lost last year because the crop was bad. Cleveland and Indianapolis appear to be doing a good business for the season. Returns from fifteen leading cities for four weeks ending January 26th, as compared with the corresponding weeks last year, show a loss of 2.6 per cent. The cities that have lost are: New York, 3.2; Philadelphia, 9.2; Chicago, 9.9; Cincinnati, 8.3; Baltimore, 3; St. Louis, 13; Pittsburgh, 1.9; Louisville, 0.4; Providence, 1. Those cities that have gained are: Boston, 8 per cent; New Orleans, 10.8; San Francisco for three weeks, 0.7; Milwaukee, 32.9; Cleveland, 13.3; Indianapolis, 15.4. The loss at several cities greatly exceeds any decrease which can be reasonably attributed to a decline in prices. At New York the apparent loss will seem greater to those who believe that clearings here are mainly governed by stock transactions, for sales of stock have been less than they were during the corresponding weeks last year. It is not possible to consider these returns without concluding, that the great uncertainty as to business prospects, which the bills still pending in Congress cause, has produced general hesitation and delay in purchases, contracts, loans and investments, and that the disastrous effects of this hesitation appear wherever some local cause does not operate more powerfully.

STATE PRINTER HILL has disposed of his printing office, including the balance of his term's State work, to Mr. Marshall Robinson, late of the Carson Appeal.

GREAT SUBMARINE ENTERPRISE.

London newspapers announce that work has been commenced at both ends of the great submarine tunnel which is to be built under the channel of the Straits of Dover, and thus connect England and France by rail. We confess that we were incredulous when this great project was first mentioned, doubting whether a tunnel under the sea was practicable, whether it would be safe, and how it could be drained and ventilated. And on some of these points we still doubt, not forgetting that the engineering art has reached great perfection.

The proposed tunnel will be forty-one miles in length, under one of the swiftest and roughest sea channels in Europe. Experiments made show that the entire bed of the strait is composed of chalk, that it can be completed in eight or ten years. But how is it to be ventilated while in progress of construction? After the workmen have bored say ten miles, at either end, how are they to obtain fresh air? A hole bored ten miles into the earth or chalk rock must be filled with an unhealthy atmosphere, and possibly with deadly gases. The plan for ventilation after the tunnel is completed is this: two parallel chambers are proposed, and it is the judgment of eminent civil engineers that railway trains running only in one direction will cause an ample current of air. But this can only be proved by trial. As to drainage, we read of no suggested plan, although it is impossible to believe that a forty mile tunnel under the sea can be wholly dry.

Should this great tunnel be a success, its commercial importance to all Europe cannot be overestimated. English railways would then connect with those of the Continent, and the steam horse could run a mighty race from London to Constantinople and St. Petersburg. And if this pioneer sea tunnel proves to be what its engineering projectors promise, how long will it be before a railway tunnel under the Atlantic will connect the Old World with the New? Seaside ocean voyagers are anxious to know.

NOT SELFISH.

Eureka has put in a claim for the Republican State Convention, and many strong points are urged in her favor. We think that Eureka is justly entitled to it. Elko, Reno, Winnemucca and Carson, have had, in turn. And it would not be fair to show either of those places partiality as against Eureka. Reno, it is true, would be a convenient place and could offer all necessary accommodations. But Reno has never been selfish, and will not be in the future. She never asks for anything to which she is not entitled, and having once been favored in this respect, lays no claim to the Convention until her "turn" comes around. Everything being taken into consideration we see no good reason why Eureka should not be the favored place this year, and we hope it will be.

CONDITION OF THE STATE.

The condition of the State is all that could be desired. The mining interests of every section give promise that our bullion yield for the year will be the largest in the history of the State. The late rains and storms insure a sufficient supply of water for the coming season, and the agricultural outlook is satisfactory to all concerned. General business prospects are encouraging, and we have many reasons to believe that the dull times are nearly over. We hear of many new industries that will be carried on, and old ones revived, and on the whole we think 1878 will be a good year for all.

SPEAKING OF THE "slate" our Virginia City correspondent put up, the Eureka Republican says:

It strikes us, from a casual looking over of the above, that that slate is likely to be smashed. Eureka county is second in the State, and does not purpose to be put off with merely a Superintendent of Public Instruction. We claim a more equitable division, since we have just as good men as other sections.

But you will have the Congress man. What more shall be Wren-dered unto Caesar?

The Chief of the Bureau of Statistics has prepared a statement of imports from each customs district of the United States during the calendar year 1877. The aggregate value of merchandise exported was \$620,000,000, and value of imports \$480,000,000. Excess in value of exports, \$140,000,000.

NEVADA AS A STOCK RAISING STATE.

An Elko correspondent of the San Francisco Chronicle makes the following truthful remarks concerning our great inland basins as cattle raising sections: "Many persons still think that the production of minerals is the only resource of this great inland basin. But a little investigation will enable them to see that another business is gradually growing to one of great importance—the raising and exporting of beef cattle. The success that has thus far attended the development of this business renders it certain that at no very distant day this will become one of the most productive sources of our wealth. A few years ago it was considered very doubtful if cattle could be wintered in this country without great loss, but experience shows this to be a mistake. On the contrary, there is no better country on the continent for this purpose than is found along the valleys of the Humboldt. Cattle fatten rapidly and the beef is of the best quality; in fact, it excels in flavor that from any other portion of the coast. There is no doubt that the time will come when this basin will constitute the main cattle-producing section of the United States, furnishing even the people beyond the Mississippi with their daily steaks. The country adapted to this purpose is not limited to any particular section between the Wasatch Range and the Sierra Novadas. It extends from the mountains north of Snake to the Colorado. The hills through all this vast region are covered with more or less bunch grass, retaining its freshness even under the snow, and supplying in the dry months of Autumn nutritious seeds, remarkable for their fattening qualities and eagerly sought after by the stock Nature intended these rolling hills and lofty plateaus for the great pasture-field of the nation.

JONES ON THE SILVER BILL.—A Tribune's Washington special says a consultation of some of the advocates of the Bland bill in the Senate took place yesterday. Jones of Nevada said that he was in favor of making the minimum coinage of silver dollars three millions per month instead of two millions, as provided for in the Finance Committee bill. He asserted that the vindication of the silver men would come in the public relief which would shortly follow the passage of the bill. It is proposed to follow up the enactment of the Bland bill with other measures providing for the issue of certificates to take the place of coin in commercial transactions. Jones will make a speech during the coming week, but it is not his intention to deal in statistics, but to devote his time to answering objections made to the practical work of the silver scheme.

PUBLIC DEBT STATEMENT.—The public debt statement for January shows a decrease in the debt for the month of \$1,668,976, and the following balance in the Treasury: Currency, \$3,170,190; special fund for the redemption of fractional currency, \$1,000,000; special deposits of legal tenders for the redemption of certificates of deposit, \$31,115,000; coin, \$126,892,959, including coin certificates, \$42,733,800; outstanding legal tenders, \$349,110,424. Payments made from the Treasury by warrants during the month of January, 1878, were as follows: On account of civil and miscellaneous, \$5,024,227; war, \$3,452,076; navy, \$1,343,503; interior, Indians and pensions, \$718,024. The above does not include payments made on account of the interest or principal of the public debt of the United States.

TYBO.—The Sun says of the outlook in Tybo: "The outlook for our little camp was never better than at the present time. The company has more men in its employ than at any time since Winter set in. Everything around the mine and furnace presents an active and busy appearance. The mine is in splendid condition—ore in sight in all the workings, and huge piles of it on the dumps and at the furnace. The machinery at the mine is in magnificent working order, and hoists with ease the vast amount of ore consumed by the furnaces daily. The furnaces are in first rate condition and are running better now than for some time previous. The combined product of the two furnaces averages about nine tons every 24 hours."

The Vallejo Chronicle says the area of land sown with wheat in that county is about equal to what it was last year, and the agricultural prospects never looked better than they do now.

SILVER MEETING IN NEW YORK.

Cooper's Institute was jammed Friday night at the meeting of those in favor of the remonetizing of silver. Charles W. Colgate, banker, was appointed Chairman and Marcus Hanlon, President of the Workingmen's league, Secretary. After the reading of a paper on the question by the Chairman the following resolutions were read and passed:

Resolved, That the citizens of New York here assembled in mass meeting without distinction of party, earnestly desire and demand the passage of the measure now pending in the Senate to restore silver to its legitimate position, which it had sustained from the foundation of the Republic up to the year 1873, and that we urge the majority of the Senate known to be favorable to the principle to bring it to a vote at the earliest moment.

Resolved, That it is the judgment of this assemblage that the recoinage of the silver dollar and its restoration to its due rank as money will approximate its value to an equality with gold, besides enabling the American people to make immediate use of one of the most valuable products with which Providence has blessed our country.

Resolved, That in as much as Congress did, in 1809, pledge its faith that the bonds of the Federal Government should be paid in coin, and inasmuch as silver dollar was lawful coin of the Government at the time of said pledge, it is therefore honest and equitable to pay the bonds either in silver dollars or in gold, and that it is unwise as well as unjust for the managers of national banks and other money-lending corporations holding Government bonds to clamor for their payment exclusively in gold.

Resolved, That the false pretense of gold bullionists that the recoinage of silver as unlimited legal tender will lessen the wages of labor is untrue and an insult to the intelligence of the industrial and producing classes. On the contrary, the advocates of silver money desire better times and better wages for all classes of citizens, such as we believe would be the early result of restoring the dollar of George Washington to the circulation.

Resolved, That the proposed limitation of the legal tender of silver to sums of \$10, or \$50, or \$100 would be in effect the establishment of one kind of coin for the citizen and another kind for the bondholder and capitalist, and meets with utter disapproval.

Resolved, That the return of confidence, revival of business, steady and remunerative employment for the now unemployed and suffering working classes, of which they have now been unjustly deprived, will be consequent upon the remonetizing of silver.

A QUIET MARKET.

Dealers Waiting for Something to Turn Up—Renewal of the War on the Water in the Flooded Mines—Prospects at the South End and at Gold Hill—What is Being Done by Our Principal Mining Companies.

(Enterprise, Feb. 1.)

The fluctuations in stocks at present are so slight that little money is being made by either the bulls or the bears. Both appear to be holding back awaiting the course of events at the north and south ends of the lode. At the south dealers are watching the progress of the negotiations for a compromise pending between the Justice and Alta Companies, and at the north they are awaiting developments on the Ophir 1900 level. The fact that Superintendent Curtis, of the Justice, and Superintendent Derby, of the Alta, were telegraphed for and left here for San Francisco last Wednesday night would seem to indicate that there is some likelihood of an adjustment of the difficulties between the two companies being perfected. It is to be hoped that some arrangement satisfactory to all parties interested may be made at once, as this trouble sits like an incubus on the south end of the lead.

At the Ophir prospecting operations on the 1900 level are being pushed ahead as rapidly as possible, and crosscuts to the ore body will be made at no distant day. Should this ore body prove as large as that recently opened on the 1750 level of the Consolidated Virginia it will be all that even the most sanguine could expect, and will be a great addition to the ore-producing sections of the mine.

Not a few are undoubtedly awaiting the starting up of the Savage pump in order to be able to form an idea of what the result will be toward draining that mine and the Hale and Norcross of the water by which the two have so long been flooded in their lower levels.

As the water is now weaker than ever before it is confidently expected that the present movement against it will prove successful and that the miners will again be in the lower levels at no distant day.

Good indications of ore are beginning to make their appearance in the North Consolidated Virginia and at the Mexican they will soon be in a condition to explore their mine on the 1900 level.

At the South end of the Lead the Lady Washington and New York companies are finding ore that assays well and the same is the case in some of the old mines at Gold Hill.

A Frenchman named Alexander Vauder Noot was drowned at Petaluma last Sunday evening while endeavoring to secure a fishing sloop to the wharf.

MONGOLIAN IMMIGRATION.

Substantial Progress of the Anti-Chinese Movement in Congress.

The House Committee on Education and Labor Thursday, after a free interchange of views on the subject, unanimously agreed that it was advisable and desirable that Chinese immigration to this country should be checked, or limited in some way. Having made this much progress toward a settlement of the question, the Committee thereupon adopted a suggestion of Chairman Goode, and directed Messrs. Willis, of Kentucky, and Loring, of Massachusetts, to draft a resolution for consideration by the full Committee at their next meeting, which shall in suitable terms instruct the President to invite the co-operation of the Governments of China and Great Britain to prevent the incorporation of coolie labor, and generally to restrict Chinese immigration to the United States.

This action of the Committee was distinctly understood to be only preliminary to further discussion on the subject, and when the resolution is submitted for consideration at the next meeting, the question will arise whether the Committee should not recommend the enactment of restrictive legislation by Congress, independently of the slow progress and doubtful results of diplomatic negotiations.

Several members of the Committee already express themselves in favor of such independent action; others, while admitting the power of Congress to legislate in contravention of treaty provisions, are still inclined to think that as a matter of expediency or international comity it is better to invite the co-operation, or at least the formal consent, of China, and perhaps of Great Britain also. The questions were therefore laid over for further consideration; but meanwhile it may be accepted as a fixed fact, showing substantial progress of the anti-Chinese movement in this Congress, that the Committee already admit the existence of the evil complained of, and are unanimously prepared to sanction at least one of the remedies proposed for their abatement. The California delegation will, however, continue to urge application of the legislative remedy, without any delay except such as may be requisite to give Government of China fair notice of our intention.

DASTARDLY MURDER.

Fire in Columbus—A Man Murdered for His Money and the Town Fired.

(Esmeralda Herald, Feb. 1.)

We are indebted to Mr. Ike Levy of this place, for the particulars of a horrible murder, robbery and incendiarism that occurred in our neighboring town on Wednesday night, furnished him by letter from Philippi Martin, of that town. Joe Parmentel was murdered between 1 and 3 o'clock on Thursday morning and his house fired and completely destroyed; also the store of R. Abrahams adjoining and a Chinese restaurant, where the fire died out sufficiently, a search was made for the body of Parmentel which was of short duration, as it was found with the arms and legs burned off. On the trunk it was found that he had been stabbed in the back while asleep, and his throat cut.

A warrant was issued and the Deputy Sheriff started in pursuit of the bad-looking stranger who had been hanging around town for a few days and disappeared that night and was seen on Thursday at Marietta. It is to be hoped he may be captured and evidence of his guilt established. We have been unable to get at the probable amount of plunder the murderer could have secured, but it is said that it would reach \$3,000 or more. Loss by fire not known.

CALIFORNIA STATE NEWS IN BRIEF.

Only one smelting furnace is represented to be running in Inyo county now.

The late storms have carried off a large portion of the wharf at Crescent City.

A great deal of grain is reported to have been drowned out by the overflow on Grand Island.

The prospects in Solano county now are favorable for an abundance of feed for stock in the course of two or three weeks.

The Napa Register of the 29th instant says: The grain upon the high valley lands is looking splendidly, and crop prospects are fine. On the lower lands the farmers are praying to Jupiter Pluvius to let up, if he does not want to overdo the thing and drown their crops.

The Herald estimates that close upon 20,000 acres of land are seeded to wheat in Los Angeles county this year, and the Express adds: Six hundred thousand bushels is a minimum figure for the crop, which is an allowance of nearly twenty bushels apiece to every man, woman and child in Los Angeles county.

CHERRY CREEK.—The Independent of Jan. 29th says:

Trains are expected to be running on the Dunbarton narrow gauge railway, between Hamilton and San Jose, by the 1st of April.

There are 2,000,000 yeast cells in one of Loef's Yeast Cakes—try one.

THE ALTA.

HUTCHINGS—WESTON—In Reno, Feb. 1, 1878, by Rev. T. J. Arnold, Joseph Hutchings to Miss Julia Weston, all of Glendale.

ANGLEMYER—TWADDLE—In Franktown, Feb. 2, 1878, at the residence of the bride's father, by J. H. Harcourt, J. P., Mr. Wm. R. Anglemeyer to Jeannette Twaddle, daughter of John Twaddle, all of Franktown. No cards.

NEW TO-DAY.

DELINQUENT NOTICE.

HIGHLAND DITCH AND WATER RENT. ANNA, Location of principal place of business, Reno, Nevada.

There are delinquent upon the following described stock on account of assessment (No. 4), levied on the 2nd day of January, the several amounts set opposite the name of the respective shareholder, as follows:

Name	Grts.	No. Shrs.	Am't.
P. Tighe	15	107 1/2	\$39 25
P. Tighe	57	100	30 00
P. Tighe	58	100	30 00
P. Tighe	59	100	30 00
P. Tighe	60	100	30 00
P. Robertson	61	200	60 00

And in accordance with law and an order of the Board of Trustees, made on the 2nd day of January, 1878, so many shares of each parcel of such stock as may be necessary will be sold at public auction at D. Lachman's store, Reno, on Saturday, March 2nd, 1877, at 1 o'clock P. M. to pay said delinquent assessment thereon, together with costs of advertising and expenses of the sale.

By order of the Board of Trustees.
A. P. BORDEN, Secretary.
Reno, February 2d, 1878.

SWEET CHewing TOBACCO. JACKSON'S BEST. Navy Tobacco. Awarded highest prize at Centennial Exposition for the chewing qualities and excellent and lasting character of its chewing and flavoring. The best tobacco ever made. As our time soon follows it is closely imitated in inferior goods, see that Jackson's Best is on every pack, box, tin, etc. Sold for sample, free, to C. A. Jackson & Co., Reno, Feb. 2nd, 1878.

Incorporation.

Articles of incorporation were filed yesterday at the Clerk's office of the Great Eastern Mining Company. Location of works Santa Fe Mining District, L. Nevada, county Nevada. Principal place of business, Reno. Capital stock \$5,000,000, divided into 150,000 shares of the par value of \$20 each. The Trustees for the first six months are J. A. Lindsay, J. B. Gamble, T. A. Gamble, James Amiot, S. Duff.

Drummer Fined.

Chas. B. Platt, a "drummer" for the San Francisco house of Gutard was arrested here yesterday for sojourn without a license. Officer Thomas "bullet" him in the act at the T. C. A. store. Judge Richardson fined him \$50 and costs, amounting in all to \$62.50 which he paid and was released. Next time he sojourns in Reno Mr. Platt will have a license, no doubt.

The Protracted Meetings at the Methodist Church which were postponed on account of the storm, will commence again this evening and continue during the week. Mr. Gray will be assisted in the meetings by Rev. A. D. Harris, Rev. N. G. Luke of Truckee and Rev. J. D. Hammond of Carson.

The Congregational Sunday School give a concert exercise this evening at their church. All are invited, admission free. The exercises promise to be of an interesting character.

"Steamer Day" to tomorrow. Be ready.

Grand Jury will be in session to-morrow.

Monday the Board of Commissioners will meet.

No District Court yesterday. It will be running as usual to-morrow.

B. B. Baum will try his hand at hotel keeping, and reopen the old Saddle Rock.

Pyramid will bring us out all right.

The Quicksilver Co. shipped fifteen flasks from Steamboat last week.

John Hoy is down with the asthma, and Harry Doves is dangerously ill with attack of the liver.

Dr. Johnson came down from Virginia yesterday. Says he is doing well up there. Glad of it.

Two dollar divs are assured from the bonuses for January. See bulletin report to date.

During the past month 314 different scholars have been in attendance at our public school.

We can't allow this opportunity to pass without mentioning that the weather is delightful.

Tom Hymers will be home in a few days.

Send us in your job printing. Good work and low prices at this office.

Ten prisoners in the county jail—six Chinese and four white men.

The Chinese quarter was visited by a number of spectators yesterday who wanted to see some of the most interesting of the New Year's ceremonies.

Agricultural Society.

The Trustees of the Agricultural Society held a meeting at the Depot Hotel last night, Babcock, Stevenson and Chamberlain present, Parker absent. The Board organized by electing W. B. Chamberlain President with the understanding that he might resign whenever he chose, C. C. Stevenson, Vice President. L. L. Crockett was elected to fill the vacancy caused by the resignation of Mr. Geo. Alb. Matters of interest, involving the welfare of the Society, were talked over.

The time for holding the next Fair set for the week commencing Monday, October 7th.

The President was authorized to negotiate a loan of \$2,000, to pay out in pressing indebtedness.

Adjourned to meet at the call of the President.

Real Estate.

There is not much excitement in Real Estate circles. Prices have shaded off a little, though holders still demand what many consider extravagant
